Summary

Frontend Developer with **7+ months** of experience building scalable, high-performance **SaaS platform** using **React, Next.js, and GSAP**. Led an 8-member team to develop a custom e-commerce suite with **real-time inventory** and a **dynamic admin panel**. Focused on performance, animation, and clean, reusable component architecture. Specialized in real-time updates and building scalable frontend architectures

Work Experience

Rittz Digital

Jan 2025 - Present

Frontend Lead (E-commerce SaaS Platform)

- Developed **SaaS platform** controlling e-commerce websites with custom **admin panel** using **Next.js**
- Led **8-member cross-functional team** (frontend, backend, UX/UI) in Agile workflow
- Implemented **drag-and-drop functionality** for live component updates with enable/disable features
- Collaborated via **RESTful APIs** for **bulk product uploads** and **real-time inventory** tracking
- Achieved **95+ Lighthouse scores** across all devices -desktop (Windows/Mac) and mobile (iOS/Android)
- Collaborated with backend team to optimize API responses, reducing **dashboard load time** by **40%**

Projects

Khwaahish | Queen of Hearts | Eshop

E-commerce Platform

- Created 3 websites sharing one **custom control panel** for easy content updates
- Implemented **drag-and-drop** section customization and **real-time updates**

Build By Samar
